Arrah, Bihar

Catholic High School, Arrah

Secondary Education (Class X) — Percentage: 73.6%

2018 – 2021

Arrah, Bihar

COURSEWORK

- Web Development
- Data Structures (DSA)
- Operating Systems
- OOPS Concept

PROJECTS

News Aggregation Platform [↗](#) | **Django, Python, SQLite, JavaScript, GNews API**

Jun 2026

- Developed a full-stack news aggregation platform that delivers real-time news through GNews API integration with category-based filtering, personalized search and article bookmarking.
- Engineered a caching and search-tracking system to reduce redundant API requests, improve response times and enhance user experience.
- Implemented secure authentication, profile analytics, URL validation and environment-based configuration following backend security best practices.
- Built scalable backend workflows using Django ORM, AJAX interactions, pagination and automated unit tests to ensure application reliability and data integrity.

Smart Library Management System [↗](#) | **Django, Python, SQLite, Bootstrap 5**

Jun 2026

- Developed a full-stack web application to manage library inventory, student records, and book circulation through a centralized dashboard.
- Implemented secure authentication with login, logout, and email-based password recovery using Django Authentication and Gmail SMTP integration.
- Engineered a complete book issue and return workflow with due-date tracking, overdue detection, and automated fine calculation for late submissions.
- Designed an analytics dashboard displaying real-time insights including inventory status, active transactions, overdue books, registered students, and fine collection statistics.
- Built advanced features such as search functionality, transaction history management, and CSV export for books and borrowing records to improve reporting efficiency.
- Utilized Django ORM and relational database design to maintain data consistency across books, students, and transaction records while delivering a responsive Bootstrap-based user interface. ““

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Java
- **Backend Technologies:** Django (MVT), Django REST Framework, Django ORM
- **Web Technologies:** HTML5, CSS3, Bootstrap 5
- **Databases:** MySQL, SQLite3
- **Libraries & Frameworks:** Numpy, Pandas
- **Developer Tools:** Git, GitHub, VS Code
